Art Unit: 1724

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 5-14 and 16 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a sprayer system having a purifier cartridge with the recited sealing structure (i.e. having an inwardly angled portion which is thinner and more flexible than other portions), does not reasonably provide enablement for the sprayer having such a sealing structure (see Fig. 5; and page 4, lines 21-26, of the specification). Accordingly, the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

Claim 15 is allowed because the references of record do not teach or fairly suggest a sprayer purifier cartridge system having a purifier cartridge with a sealing structure of the type recited.

Claim 4 is objected to as being dependent upon a rejected base claim, but would also be allowed if rewritten in independent form to include all of the limitations of parent claim 1.
